ASP.NET MVC
RUBY

HOBBIES

Combat sports, boxing, MMA

PROFILE

I have been a developer for over 20 years. My most recent work has involved full stack development on single page javascript applications. I have used most of the popular javascript frameworks with reactjs being my current favourite.

My company website <https://cutting.scot/> is a server rendered react website, [here](#) is the source code.

My open source contributions and github repos can be found [here](#) and my public development blog can be found [here](#).

[Here](#) is an example of react code I have written.
[Here](#) is an example of angular code I have written.
[Here](#) is an example of an emberjs component I wrote.

I am a keen open source committer.

I have this [pull request](#) committed into the emberjs source code.
